EDUCATION

De La Salle University - Manila

BS Computer Science - Major in Software Technology

Taft Avenue, Manila

2023 – present

- Consistent Dean's Honors List Awardee (at least 3.000 GPA) | CGPA: 3.430

SKILLS

- Languages: Python, JavaScript, Java, C/C++, SQL, Kotlin
- Tools and Frameworks: React, Tailwind, NodeJS, ExpressJS, MySQL, MongoDB, Docker, AWS
- Uses Git and GitHub for version control and collaboration

EXPERIENCE

DLSU Center for Computational Imaging and Visual Innovations (CIVI)

Research Lab Member, 2025-Present

- Designed a synthetic data generation pipeline for lip-reading research, combining 3D facial reconstruction and generative modeling techniques
- Participated as a key speaker for a lecture and hands-on workshop on image classification (CNNs) to high school interns under AdRIC's Science Immersion Program

CERTIFICATIONS

- Amazon Web Services - AWS Certified Cloud Practitioner
- Accenture - Advanced Program for AI Applications: Generative and Agentic Systems

PROJECTS

Unbound - Case Management System

CSSWENG Course Project, 2025

- Led frontend development for a full-stack Case Management System, architecting the client application in React (Vite) and integrating it with an Express/MongoDB REST API
- Practiced collaborative development workflows (feature branching, pull requests, code review) as part of a 9-person engineering team

Kasama - Collaborative Household Management App

MOBICOM Course Project, 2025

- Co-built an offline-first Android app (Kotlin, Room, Firebase) for household chore and note collaboration among roommates
- Contributed to real-time collaborative features (chore tracking, shared notes, household invites)

Connectify - Web Forum App

CCAPDEV Course Project, 2025

- Built a full-stack forum application using Node.js, Express, and MongoDB (Mongoose) following an MVC architecture with separated routes, controllers, and models
- Deployed the application to a live production environment (Render), making it publicly accessible

WESM Price Prediction - Electricity Spot Market Forecasting

STINTSY Course Project, 2026

- Built and benchmarked a PyTorch neural network against classical ML and LSTM models for electricity price forecasting, as part of a larger 5-model comparison study
- Conducted error analysis segmented by price regime to evaluate model performance on rare, high-impact events (price spikes) versus normal conditions
